BASIC INSTRUCTIONS

PAPER

The best paper to use for origami will be very thin, keep a crease well, and fold flat. It can be plain white paper, solid-color paper, or wrapping paper with a design only on one side. Regular typing paper may be too heavy to allow the many tight folds needed for some figures. Be aware, too, that some kinds of paper may stretch slightly, either in length or in width, and this may cause a problem in paper folding. Packets of paper especially for use in origami are available from craft and hobby shops.

Unless otherwise indicated, the usual paper used in creating these forms is square, 15 by 15 centimeters or approximately 6 by 6 inches. Some forms may call for half a square, i.e., 3 by 6 inches or, cut diagonally, a triangle. A few origami forms require a more rectangular size or a longer piece of paper. For those who are learning and have a problem getting their fingers to work tight folds, larger sizes of paper can be used. Actually, any size paper squares can be used—slightly larger figures are easier to make than overly small ones. The paper provided within this gift set is 6 by 6 inches, easy to work with for origami novices.

GLUE

Use an easy-flowing but not loose paper glue. Use it sparingly; don't soak the paper. A toothpick makes a good applicator. Allow the glued form time to dry. Avoid using stick glue, as the application pressure needed (especially if the stick has become dry) can damage your figure.

TECHNIQUE

Fold with care. Position the paper, especially at corners, precisely and see that edges line up before creasing a fold. Once you are sure of the fold, use a fingernall to make a clean, flat crease. Don't get discouraged with your first efforts. In time, what your mind can create, your fingers can fashion.

BASE FOLDS

Base folds are basic forms that do not in themselves produce origami, but serve as a basis, or jumping-off point, for a number of creative origami figures—some quite complex. As when beginning other crafts, learning to fold these base folds is not the most exciting part of origami. They are, however, easy to do, and will help you with your technique. They also quickly become rote, so much so that you can do many using different-colored papers while you are watching television or your mind is elsewhere. With completed base folds handy, if you want to quickly work up a form or are suddenly inspired with an idea for an original, unique figure, you can select an appropriate base fold and swiftly bring a new creation to life.

Travel to an incredible world by creating famed figures from ancient tales.

A dragon, a phoenix, Pegasus, unicorns, and other fantastic creatures exist only in myths and legends—or do they? You can make your own beautifully detailed, intricately folded origami versions.

The flying fox appears to soar into the night sky, while a centaur stands proud and regal. There's a fabled sphinx, a spectacular dragon with wings extended, and a wild duck placidly floating along.

From a centaur to a hydra, these imaginative designs are perfect decorations for your home and on gifts.
